

SearchMaster Update Alert & Newsletter

May 9, 2014

There are 27 updated glossaries for you today!

Click the "News & Updates" tab at the bottom of SearchMaster's main screen!

Are you using the *latest* version of SearchMaster -- **12.0.0.2**? If not, and your subscription is current, click [HERE](#) to download and install Version **12.0.0.2**

Note to Avast Users!

-
Right-click the Avast globe and turn *off* the Shield *before* downloading and installing. Avast *very* often identifies files as viruses that are *not* viruses. Duh.

Are you right-clicking?

Every reference in SM can be *right*-clicked and sent either to **Google** for more information or to **One-Look Dictionaries** for definitions. **Every** reference in SM!

But SearchMaster Does It Anyway!

In the entire history of the human race, it has never been possible for reporting professionals to find the spelling of a word or name that appeared in a transcript or transcripts prepared years ago -- until SearchMaster came along. You have SearchMaster. Have you created your Career Index yet? If not, click [HERE](#) to watch a little movie that will change your research life. For instructions on how to create your Career Index, click the **Transcripts & Indexing** tab in your SearchMaster; then *double*-click the question mark on the **Career Index** button. You'll be glad you did. Count on it.

Basic Webinar [HERE](#)
Intermediate Webinar [HERE](#)
Advanced Webinar [HERE](#)

You've looked up a **drug name**, and now you want to know what that drug is **for**? **Right**-click that drug name in SearchMaster, send it **Google**, and you'll know what that drug is used for!

You've looked up an **attorney** or a **doctor's** name, and you want more information than just the spelling – like an address, a firm affiliation, or a phone number? **Right**-click the name and send it straight to Google for that info!

You've looked up a word like "**anthropomorphize**," and now you want to know what that word **means**? Right-click it, send it to the **One-Look Dictionaries**. **One-Look** will search over a **thousand** dictionaries at the same time for the definition. It's like having an entire library of dictionaries built right into SearchMaster!

[Too Shy to Ask?](#)

You've been trying to do something in your SM. You've watched the tutor movies, but for whatever reason, you're just flat-out, big-time stumped. Don't be too shy to call me for the assistance you need. I'm here, I'm ready to help, the call is free, and my phone number is displayed at the top of SM's main screen.

Facebook Groups I've Set Up for You!

Court Reporters Group > [HERE](#)
(Focus is on punctuation of transcripts)

SearchMaster Group > [HERE](#)
(Focus is on SearchMaster, of course.)

Windows 7 & 8 Group > [HERE](#)
(Focus is on all things Windows 7 & 8)

Keep 'em Coming, Friends!

Your contributions to SM's glossaries are *very* much appreciated, friends; so if you had to go to some *other* source to find what you *didn't* find in SearchMaster, please send me that reference so I can add it to the next update! Either to click the little white tech support envelope in the extreme lower right corner of SearchMaster's main screen or send an email to me at searchmaster.jim@gmail.com
